This series of seminars is intended as an aid and a stimulant to child therapists with a range of clinical experience. Participants will share clinical dilemmas, challenges and resolutions in a collegial atmosphere.

This series will be led by **Jacqueline Hanley**, whose approach is mainly informed by Self Psychology and Intersubjectivity. Jacquie is a clinician with a wide range of experience and expertise and one of TCPP's most experienced faculty members. She will encourage participants to view clinical material presented in the series through the lens of their own self-state experience as a guide to deeper psychoanalytic understanding and therapeutic action.

REGISTRATION DEADLINE: December 17, 2010
